No. L.B.D.97.

Office of the Collector of Bijapur.

Bijapur, 5th November 1939.

From

M.S.Moulvi, Esquire, M.A.,

Collector of Bijapur.

To

Commissioner, S.D., Belgaum.

Sir,

In continuation of my letter No. L.B.D.-97 dated 15-8-1939 and with reference to your endorsement thereunder to Government, copy of which was forwarded to me under your No. I.R.R. dated the 10th September 1939, I have the honour to state the question of the 24 tank projects in this District prepared by the Executive Engineer, Bijapur Division, was placed before the District Committee for consideration on 29-10-1939.

2. The following tank projects were approved as Village Water Supply Works.

	Estimated cost.
(1) Tank at Honwad Taluka Bijapur	Rs. 7,902/-
✓ (2) Tank at Babanagar -do-	" 16,960/-
✓ (3) Tank at Karjol -do-	" 31,935/-
(4) Tank at Lalsangi Taluka India .	" 36,573/-
(5) Tank at Singnapur --do-	" 23,556/-
✓ (6) Tank at Godihal --do--	" 19,469/-
(7) Tank at Ganihar Taluka Sindgi	" 18,944/-
✓ (8) Tank at Jammaldinni Taluka Muddebihal.	" 34,297/-
✓ (9) Tank at Nagraldon Taluka Bagewadi	" 10,154/-

3. The remaining tank projects shown below were not approved as Village water Supply tanks for the reasons given against each of them.

(1) Tank at Ittangihal Taluka	31,173/-	This will affect the water supply of Bhutnal Tank.
Bijapur. Rs. 31		
(2) Tank at Shivangi -do-	Rs.19,927/-	There is no difficulty of water supply as there are several wells in the village.
(3) Tank at Mannankalgi Taluka	Rs.17,986/-	Distant from village site, not suitable as Village Water Supply work.
Indi.		
(4) Tank at Savalsang -do-	~~Rs.38,201/-~~ 32,888/-	There is no difficulty of water supply in the village.
(5) Tank at Aheri, Taluka Sindgi	39,201/-	-do-
(6) Tank at Chik-Sindgi -do-	Rs. not known	-do-
(7) Tank at Timmapur, Taluka Hungund.	-do-	-do-
(8) Tank at Nadalgeri, Taluka		
Muddebihal.	Rs.25,288/-	-do-
(9) Tank at Devar-hulagbal -do-	Rs.22,408/-	-do-
(10) Tank at Bidarkundi -do-	Rs.28,078/-	-do-
(11) Tank at Hiremural -do-	Rs.30,896/-	-do-
(12) Tank at Mulwad, Taluka Bagewadi		
	Rs.29,672/-	Not useful as village water supply tank.
(13) Tank at Kudgi -do-	Rs.19,708/-	Distant from village site and no water difficulty.
(14) Tank at Kaulgi -do-	Rs.27,729/-	-do -
(15) Tank at Nagradinni -do-	Rs.46,914/-	-do-

I have the honour to be,

Sir,

Your most obedient servant,

Sd/- M.S. Moulvi,

Collector of Bijapur.

No.L.B.D.97.
Bijapur, 3rd November 1940.

From

M.S.Moulvi, Esquire, M.A.,
Collector of Bijapur.

To

The Commissioner, S.D.,
B E L G A U M.

Sir,

With reference to your No.I.R.R. dated 7-1-1940 I have the honour to enclose herewith a copy of letter No. M.I. 7 dated 9-10-1940 from the Superintending Engineer, Southern Circle, Belgaum and to state as under:-

2. The Superintending Engineer states that all the 21 tank works mentioned in the statement accompanying his above quoted letter are expected to be of utility to the villagers and their cattle and are valuable as potential scarcity and famine works. He therefore requests to include these works in the scarcity programme and obtain administrative approval of Government so that ^tis may be possible to take up these works at short notice whenever required. Accordingly the Executive Engineer, Bijapur Division, Bijapur has sent the plans and estimates of the first set of eight tank projects at serial Nos. 1, 2, 4, 5, 7, 10, 19 and 20 of the statement accompanying the Superintending Engineer's letter.

3. I agree with the proposal of the Superintending Engineer, S.C., and request you kindly to move Government to accord their administrative approval for the works mentioned above. The plans and estimates in respect of eight works are enclosed herewith.

I have the honour to be,
Sir,
Your most obedient servant,
Sd. M.S.Moulvi,

Collector of Bijapur.

From

L.E.Greening ,Esquire, I.S.E.,
Superintending Engineer,
Southern M Circle.

To

The Collector of Bijapur,
Bijapur.

Subject - Water supply tanks in the Bijapur
District.

Sir,

I have the honour to state that detailed plans and estimates have been prepared for 21 tanks in the several talukas of the Bijapur District as mentioned in the accompanying list and it is presumed that many of these are pending in your office.

2. These tanks when constructed are expected to be useful in conserving the run off from their catchments and as a result to raise the sub-soil water level in their vicinity and thus be of utility to the villagers and their cattle.

3. Besides they are valuable as potential scarcity and famine works, and are likely to be particularly useful as such as they are capable of affording concentrated works in the interior of the district where relief during scarcity and famine is generally most needed. They have, therefore, been or are being included in the combined scarcity and famine programme of the Bijapur District.

4. In order that it may be possible to take up these works at short notice if and when necessary, it is essential that they should be administratively approved and the plans and estimates thereof technically sanctioned.

5. It is, therefore, requested that administrative approval of Government to all these works may kindly be

obtained subject to the provision that they will be

-taken only if and when famine or scarcity conditions arise .Presumably they have hitherto not been administralatively approved as ordinary works because they are rather costly.

In this connection a reference is invited to Government (G.D.) No.S.-92(15)/D,dated the 10th June 1939 and Government Resolution (G.D.)No. J-92 ,dated the 9th February 1939 .

7. The Executive Engineer, Bigapur Division, is being requested to forward to you such of the projects mentioned in the accompanying list as are in his office.

I have the honour to be ,

Sir,

Your most obedient servant ,

Sd/- L.E.Greening.

Superintending Engineer,

Southern Circle.

sd/- ^{E.} G. L. GREENINS.

Superintending Engineer, S.C.

Belgaum, 5-12-1940.

Memorandum.

The undersigned presents compliments to the Collector of Bijapur and with reference to his L.B.D. 97 dated 3-11-40, has the honour to say that the Collector and the Commissioner discussed this question with the Superintending Engineer, and the Executive Engineer and the President District Local Board at Bijapur on 4th December 1940.

It was agreed that none of the tank^s works would be required during the present season and that there would therefore be time to consider them more fully.

It transpired that the District Water Supply Committee had scrutinised the^{se} works (see the Collector's letter L.B.D. 97 of 5-11-39) purely from the point of view of facilities for drinking water.

p. 2

The Collector is requested to have the 15 works which the Committee rejected as unnecessary for the provision of drinking water examined carefully on the spot and report whether they are really desirable in the interests of the villages which they will serve for the purposes of supplying water for such purposes as watering cattle, washing clothes and raising the subsoil water. It will be of no use to include in the scarcity list works which ^{will} merely put agricultural land out of the production without serving any substantial object.

Sd/- E.W.Perry,

Commissioner, S.D.

Subject:- Scarcity programme.
Bijapur District.
Regarding construction of tanks.

No.L.B.D.-97.
Bijapur, 30th May 1941.

From

M.S.Moulvi, Esquire, M.A.,
Collector of Bijapur.

To

The Commissioner, S.D.,
B E L G A U M.

Sir,

With reference to your No.F.A.M.-93 dated 5-12-1940 regarding the examination of the 15 tank works, I have the honour to state that all the works were got examined on the spot by the Prant Officers. Thirteen out of them are reported to be desirable in the interest of the villagers as they serve the purposes of watering cattle, washing clothes and raising the subsoil water. The remaining two tanks, one at Aheri in Sindgi Taluka and the other at Nagardinni in Bagewadi Taluka are not useful as they will not secure any substantial object to the villagers. I would, therefore, request you kindly to order the inclusion of the thirteen tank works (excluding Aheri and Nagardinni tanks out of the fifteen) in the programme of scarcity works.

I have the honour to be,
Sir,
Your most obedient servant,

Sd. M.S.Moulvi,
Collector of Bijapur.

Subject:- Scarcity programme.

Bijapur District.
Regarding construction of tanks.

Reply to Collector of Bijapur's letter L.B.D.97, dated 30th
May 1941.

No. F.A.M.-93.

Office of the Commissioner, S.D.

Belgaum, 7th June 1941.

The 13 tank works may be included in the programme of
scarcity works.

2. As regards the tank works at Aheri and Nagardinni, if
the Superintending Engineer, who is being consulted, agrees
Government will be asked to abandon them permanently.

3. Out of the 13 tank works plans and estimates have been
received only in respect of the works at (1) Shivangi (2) Mannan-
kalgi (3) Savalsang (4) Hadalgeri (5) Mulwad and (6) Kudgi.
Submission of the plans and estimates in respect of the remaining
works should be expedited.

4. Plans and estimates in respect of the tank works at
Karjol and Jammaldinni included in the scarcity programme should
also please be sent.

Sd/- E.W. Perry,
Commissioner S.D.

To

The Collector of Bijapur.

J.

Bijapur District.
Regarding construction of tanks.

No. F.A.M.

Office of the Commissioner S.D.

Belgaum, 7th June 1941.

Memorandum.

The Collector of Bijapur states in his enclosed letter L.B.D. ^{p. 13} 97 dated 30th May 1941 that the tank works at (1) Aheri in Sindgi taluka and (2) Nagar-dinni in Bagewadi taluka are not useful as they will not secure any substantial object. The Superintending Engineer is requested to state whether there is any objection to Government being moved to order that these two tank works should be dropped permanently.

Sd/-W.W.Perry,

Commissioner S.D.

To

The Superintending Engineer, Southern
Circle, Belgaum.

J.

Letter M.I. 7 dated 27th June 1941 from the Superintending Engineer, Southern Circle to the Commissioner S.D. Belgaum.

Subject:- Scarcity programme.

Bijapur District:
Regarding construction of tanks.

With reference to your office No. F.A.M. 93, dated the 7th June 1941, I have the honour to state that under the circumstances I see no objection in adopting the course suggested.

2. Another tank in place of the Aheri tank is under construction, vide this office No. M.I.-7 of even date.

3. A copy of your office No. F.A.M. ^{10.11} 93 dated the 5th December 1940, may kindly be sent for the information of this office.

Letter L.B.D.97 dated 17th June 1941 from the
Collector of Bijapur to the Commissioner, S.D. Belgaum.

Subject:- Scarcity Programme.

Bijapur District.
Regarding construction of tanks.

" With reference to your F.A.M.-93 dated
7-6-1941 on the subject mentioned above, I have the
honour to state that the plans and estimates of the
remaining seven works are not in this office and the
Executive Engineer is requested for the same.

2. Reference is invited to G.M., G.D., No.S.92(15)-
19223-D, dated the 7th January 1941 disapproving --
Devarhulagabal tank project in Muddebihal Taluka either
as a scarcity, minor irrigation or village water supply
work. As the work is desirable in the interest of the
villagers on the ground that it would serve for the
supply of water for such purposes as watering cattle,
washing clothes and raising the sub-soil water, it is
requested that Government in the General Department may
be moved to reconsider the orders contained in G.M., G.D.
No.S.92(15)-19223.D dated 7-1-1941.

3. As regards Ittangihal tank, it is submitted
that there is a serious objection to the undertaking of
this project as its construction will affect prejudicially
the Bijapur Municipal Water Supply Tank at Bhutnal. This
point was lost sight of when submitting my letter x dated
31-5-1941. Ittangihal tank may kindly not be included
in the Scarcity Programme."

No.F.A.M.-93.

Office of the Commissioner S.D.

Belgaum.15th July 1941.

Forwarded with compliments to the Superintending Engineer, Southern Circle, Belgaum.

2.The Commissioner does not think that he is in favour of reviving the Devarhulugbal tank project. --
However this can be considered with all the other similar projects.

The Superintending Engineer is requested to state whether he agrees that the Ittangihal project should be finally dropped.

Sd/- D.S.Golikeri,

For Commissioner S.D.

Letter M.I.7 dated 24th July 1941 from the
Superintending Engineer, Southern Circle, to the
Commissioner S.D. Belgaum.

Subject:- Small tanks in Bijapur District.
Construction of --

" With reference to your endorsement No. F.A.M.93
dated the 15th July 1941, I have the honour to state that
in my opinion the Devalhulagabal tank project should be
subject to the same decision as will have to be given
in regard to the general question of constructing small
tanks in the Bijapur Division.

2. I agree that the Ittangihal tank project should
be finally dropped.

Subject:- Scarcity programme.
Bijapur District.
Regarding construction of tanks.

No. L.B.D.97.

Bijapur, 28th July 1941.

From

M.S.Moulvi, Esquire, M.A.,
Collector of Bijapur.

To

The Commissioner,
Southern Division, Belgaum.

Sir,

With reference to your No.F.A.M.93, dated -
7-6-1941, on the subject mentioned above, I have the
honour to state that the projects, plans and estimates

-----)	for the margin-
1.Hiremural in Muddebihal Taluka	} ally noted six } tank works have } been submitted
2.Koulgi in Bagewadi Taluka	
3.Bidarkundi in Muddebihal Taluka	
4.Karjol in Bijapur Taluka	
5.Timmapur in Hungund Taluka	
6.Jamaldinni in Muddebihal	
-----)	

to you. The plans and estimates for Ittangihal tank work
in Bijapur taluka are retained in this office as the
work has not been recommended. As regards the plans
and estimates in respect of Devarhulgabal tank they -
are not available. They are reported to have not been
received back from Government.

2. As regards Chik-Sindgi tank, the Executive-
Engineer reports that preliminary survey was carried
out and that further investigation and preparation of -
project were given up as the scheme was found to be too
costly. If the plan and estimate for this work are -
found necessary the Executive Engineer will be requested
to get the same prepared after further investigating the
scheme on hearing from you.

3. This finally disposes of your endorsement No.
F.A.M.93 dated 7-6-1941.

I have the honour to be,
Sir,
Your most obedient servant,

Below correspondence ending with letter L.B.D.
97 dated 28th July 1941 from the Collector of Bijapur.

No. F.A.M.-93.

Office of the Commissioner S.D.

Belgaum, 11th September 1941.

RECEIVED
GENERAL DEPARTMENT
592(15)

15. SEP. 1941

16621

S u b m i t t e d.

2. The Commissioner recommends that administrative approval may be given to the 13 works mentioned below :-

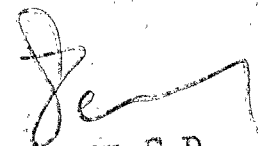

X (1) Babanagar, (2) Shivangi, (3) Karjol,
(4) Savalsang, (5) Hadalgeri, (6) Kudgi, (7) Koulgi,
(8) Hiremurnal, (9) Manankalgi, (10) Godihal, (11)
Jamaldinni, (12) Bidarkundi and (13) Mulwad. A

3. The Commissioner would like to reserve the proposed tank work at Timmapur for inspection because the benefits do not seem as clear as in the other cases. He also does not recommend that the cases of Nagaraldon and Devarhulagbal which have been rejected by Government should be reconsidered at present. In each case the population affected is very small and the Commissioner would like to see the places before making his recommendations.

4. In the case of the 13 works recommended above there are obvious benefits to the population. These returns may be fairly small but are higher than those of many scarcity works of the past - particularly of the large metal breaking works. The works are well spaced throughout the district and will represent in bulk a most useful stand-by on the scarcity programme. It will of course be well understood that none of them is to be undertaken except in the last resort but it cannot be assumed that none of them will be required even though reliance is now being placed on bunding

village works and the like. It is improbable that many of them will ever be undertaken unless experience shows that this type of work is of greater value than at present appears likely.

General Department.

Commissioner S.D.

Copy forwarded with compliments to :-

- (1) The Superintending Engineer S.C. Belgaum
- (2) The Collector of Bijapur.

The Commr., S.D., wants Govt. to give administrative approval to the 13 tank works specified by him. Presumably the works are intended to be included in the scarcity programme of the Bijapur district. Under section 9 of the Famine Relief Code the works so selected for inclusion in the scarcity programme -- should be such work^s as can be started at a moment's notice and complete estimates in respect of which must be ready. Under section 11 of the Famine Relief Code the works selected should also be of real economic value. The Commr., S.D., reports that the return from these works, though fairly small, is higher than that of the many scarcity works of the past. In view of this there appears no objection to giving administrative approval to the works, but before the works are actually started the sanction of Govt. may be obtained as the Collector's report shows that agricultural situation in the Bijapur district has improved. A (R) has agreed that in view of this there is at present no necessity to undertake any road works in the Bijapur district as relief works. The Commr., S.D., has stated that none of the works is to be undertaken except in the last resort. Bunding works will absorb scarcity labour in the Bijapur district.

2. In some cases where the top width of dam is kept 8', the Ex. Engr. has stated that it will be reduced to 6' while preparing fair plans and estimates. This appears to be in order. The saturation line is drawn from the H.F.L. in most cases. In the case of such small tanks situated in the arid tract of Bijapur the W.W. will hardly flow for any appreciable length of time and the requirements of safety will be met if it is drawn from F.S.L. This will reduce the earthwork particularly of the rear berm in the gorge portion of dams. If approved, the S.E. may be informed accordingly. In the case of some tanks it is stated in the general description that there will be surplus water for carrying out irrign. but no outlet is provided for issuing water. The S.E. may be requested to consider the necessity of providing outlets in such cases.

3. The cost per m.cft. of water stored varies from over Rs 4,500 to well over Rs 9,000. This is high but can hardly be lowered

lowered.

6/11/41

I agree with the above remarks of the
A.E.

2/ The coping over the Waste-weir is provided at various rates Viz Rs 70/- to Rs 250/- per 100 Cft. The latter rate is for Cut-stone coping. We may put in C.C. coping at Rs 70/- per 100 Cft or cheaper stone coping. Coping at Rs 2/8 per Cft is a luxury for such works.

3/ Tank at Savalsang A road is to be diverted as shown on plan but there is no provision in the Estimate, which may be made. Cut-stone coping at Rs 2/8 per Cft may be reduced in fair estimate, to a cheaper type.

Tank at Kariol The road Diversion is shown at Rs 1000/- but the line of diversion and the land required are not shown.

4/ Tank at Hire-Mural Under Brief History Irrigation facilities are mentioned first. The sheet of principal features shows that in all 28 acres of land will be acquired and the irrigable area proposed is only 37 acres. Thus this tank will be principally Water-supply Tank.

Tank at Timmapur. The brief History in the General Description Sheet mentions that the tank proposed is an irrigation one. On page 11 under principal features we find that the Irrigation Area is 58 acres against an area of 58 acres to be acquired for works. Thus irrigation can not be the aim of this tank.

Letter No.15067 dated 16-10-1941 from the Deputy Director of Agriculture, S.D. Dharwar, to the Collector of Bijapur.

Subject:- Tank at Hiremural, Taluka Muddabihal, regarding opinion --

" With reference to the correspondence ending with the Executive Engineer, Bijapur's letter No.M.I-7/3 dated 12-7-1941, on the above subject, I have the honour to report that on inquiry and inspection by my staff of fields shown on the plan sent to me as likely to be irrigated by the proposed tank, it was found that a little portion of the fields i.e., S.Nos. 2,4 and 60 along with southern side of the proposed irrigation channel as shown in the site plan is suited for seasonal crops like maize, Bajari, Kharif Jowar and onion and the remaining portion is not suitable for irrigation. The soil is loamy and Kurl. The depth of the soil is 1 to 3 ft. only. The area under the proposed irrigation suited for seasonal crops is estimated to be 8 to 9 acres only. This soil is likely to be turned into Kurl in a course of 5 to 10 years under continuous irrigation.

2. The Index Plan and the Site Plan sent by the Executive Engineer, Bijapur under his above number, are returned herewith."

Subject:- V.W.S. Works.
Bijapur Dist.

Memo.

The u.s.p.c. to the S.E., S.C., and is directed to request that the following points should be attended to at the time of ~~the~~ execution of the work; approved in G.M., R.D., No. 1590-A/39, ~~137~~ dated the 5-12-41 :-

(1) The saturation line is drawn from the H.F.L. in most cases. In the case of ^{such} small tanks situated in the *arid* tract of Bijapur the W.W. will hardly flow for any appreciable length of time and the requirements of safety will be met if it is drawn from the F.S.L. This will reduce the earth work particularly of the rear berm in the gorge portion of dams. In the case of some tanks it is stated in the general description that there will be surplus water for carrying out irrigation but no outlet is provided for issuing water. *The necessity of providing outlets in such cases should be considered.*

(2) The coping over the W.W. is provided at various rates viz. Rs. 70/- to Rs. 250/- per 100 c.ft. ~~■~~ The latter rate is ~~cut~~ cut-stone coping. C.C. coping at Rs. 70/- per 100 c.ft. or cheaper stone coping should be provided, as coping at Rs. 2/8/- per c.ft. is an *unnecessary* luxury for such works.

(3) Tank at Savalsang. A road is to be diverted as shown on plan but there is no provision in the estimate, ~~which~~ *which* should be made. ~~xx~~ Cut stone coping at Rs. 2/8/- per c.ft. should be reduced, in ~~a~~ fair estimate, to a cheaper type.

Tank at Karjol. The road diversion is shown at Rs. 1000/- but the line of diversion and the land reqd. are not shown.

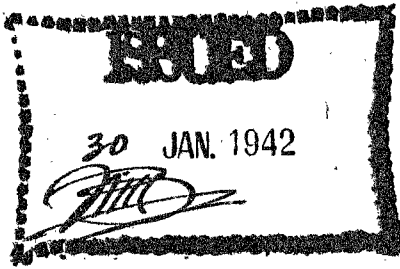

2/ *As regards*
(4) Tank at Hire-Mural. Under 'Brief History' Irrigation facilities are mentioned first. *under brief history* The sheet of principal features shows that in all 28 acres of land will be acquired and the irrigable area proposed is only 37 acres. Thus this tank will be principally a water supply ~~xx~~ tank.

3/ *with regard to the plans & estimate of the*
(5) Tank at Timmapur. The Brief History in the General Description Sheet mentions that the tank proposed is an irrign. one. On p. 11 under principal features, ~~it is stated~~ *it is stated* that the Irrigation Area is 58 acres against an area of 58, ~~acres~~ *acres* to be acquired for

works. Thus irrigation cannot be the ^{main} aim of this tank.

Please see para 2 of the K. V.
note dated the 8th Jan 1942.

The presumption made therein
is correct. It is not clear whether
the execution of any of the
works administratively approved
has been undertaken by now.
Very probably it has not been
undertaken since as it appears
from A at p. 33 that none of
the works is to be undertaken
except in the last resort.

If, however, any expenditure
is likely to be incurred on
any of the works in question
during the current year the
R.D. will no doubt approach
this Dept. in time for the
necessary funds.

The papers may be returned

Subject:- Village Water Supply Works:
Bijapur District.

Sir,

With reference to the correspondence resting with this office No.M.I.7/1, dated the 7th February 1942, I have the honour to state that the fair plans and estimate for the work of constructing a water supply tank at Manankalgi, taluka Indi, approved administratively in Government Resolution (Revenue Department) No.1590-A/39, dated the 5th December 1941, have been submitted by the Executive Engineer, Bijapur Division, for technical sanction.

2. The work under reference is situated in the scarcity stricken area and is likely to be required for employment of scarcity labour. As such it is proposed to sanction the plans and estimate very early and to keep the work ready for execution.

3. It is, therefore, requested that Government may kindly be moved to issue early orders on this office

office letter No. B.J-22, dated the 23rd December 1941 to enable technical sanction to the plans. and estimate.

Village Water Supply Works, Bijapur
District.

Water Supply tank at Mulwad, taluka
Bagewadi.

Administrative approval and technical
sanction to the revised plans and
estimate for the construction of the —.

GOVERNMENT OF BOMBAY.

PUBLIC WORKS DEPARTMENT.

Resolution No. 6538/36.

Bombay Castle, 1st September 1943.

Read Government Memorandum, Revenue Department, No. 1590-A/39, dated 5th
December 1941.

Letter No. G. 116, dated 2nd July 1943, from the Superintending Engineer, Southern
Circle, as under :—

“ Reference : Government Memorandum (Revenue Department), No. 1590-A/39,
dated the 5th December 1941, according administrative approval to the work under
reference amounting to Rs. 29,672 (inclusive of percentage charges).

“ 2. The plans and estimate, in fair, the latter amounting to Rs. 32,482 (inclusive
of percentage charges) for the work mentioned above, are herewith submitted for revised
administrative approval and technical sanction.

“ 3. Since the estimated cost (Rs. 25,577) of the work portion exceeds that approved
administratively (viz. Rs. 22,799) by more than 10 per cent. revised administrative
approval of Government is necessary in view of paragraph 132 of the Public Works
Department Manual, Volume I.

“ 4. The increase in the estimated cost of the work is due to the revision of the
original rates provided to suit the prevailing rates.

“ 5. In anticipation of revised administrative approval and technical sanction of
Government, the work is being started by the Executive Engineer, Bijapur Division, for
the relief of distress in the Bagewadi Taluka. The action taken by the Executive Engineer
has been approved by this office.

“ 6. The remark made in sub-paragraph 1 of paragraph 1 of Government
Memorandum (Public Works Department), No. R.D. 1590/A/39-M, dated the 29th
January 1942, has been attended to.

“ 7. The Executive Engineer will be requested to attend to the following remarks
during construction :—

Stone coping.

(i) In view of sub-paragraph 2 of paragraph 1 of Government Memorandum
(Public Works Department), No. R.D. 1590/A/39-M, dated the 29th January 1942,
cement concrete coping as originally proposed (should cement be readily available)
or a cheaper type of stone coping to be provided.

L P.W.D. T 62

● Outlet.

(ii) Since under present conditions C. I. pipes would not be readily available, a masonry drain outlet with regulating arrangement (utilizing timber design) to be constructed.

"8. The rough plans and estimate for the work approved administratively accompany for reference and favour of early return."

RESOLUTION.—The revised plans and estimate, the latter amounting to Rs. 32,482 for the construction of a water supply tank at Mulwad, taluka Bagewadi, district Bijapur, are approved administratively and sanctioned technically subject to the remarks contained in the accompanying technical note by the Chief Engineer to Government.

2. The action of the Superintending Engineer, Southern Circle, in allowing the Executive Engineer, Bijapur Division, to commence the work as a relief measure in anticipation of administrative approval and technical sanction of Government is approved.

By order of the Governor of Bombay,

C. G. KALE,

Deputy Secretary to Government.

G. R. No. 6538/36, P. W. D., dated the 1st September 1943.

The Accountant General, Bombay.
The Executive Engineer, Bijapur Division.

No. of 1943.

Copy forwarded for information and guidance to

Accompaniment to Government Resolution, Public Works Department, No. 6538/36, dated the 1st September 1943.

Technical note by the Chief Engineer to Government on the fair plans and estimate for the construction of a water supply tank at Mulwad, taluka Bagewadi, district Bijapur.

The following points should be attended to during the execution of the work, so far as is feasible:—

(1) In order to withstand better the action of water and ripples, the excavated hard stuff like soft rock should be placed on the waterside slope of the dam to serve as some sort of pitching, instead of on the rear side where the masonry casing as provided will be sufficient.

(2) Puddle trench should be provided for the whole length of the dam touching the water line.

Copy of D.O. letter, dated the 15th October 1945, from the Secretary to the Governor, Bombay, addressed to the Secretary to Government, Public Works Department (Irrgn.) regarding Tanks and Wells in Bijapur District.

When His Excellency was in Bijapur it was urged that Government should take steps to introduce all possible minor irrigation schemes into the District, and also to assist in the installation of wells and pumps. His Excellency would be grateful for your remarks on the subject.

2. It was also suggested that the following three half-completed tank works should be completed. (They are perhaps famine works). Their names are:-

- (1) Makarjar Tank,
- (2) Arsinghe Tank, and
- (3) Darnal Tank.

(The spelling may not be correct).

His Excellency would like to know what the position is in this respect.

.....

Public Works Department
Secretariat,
Poona, 17th October 1945.

W. J. G.
11.12.45

Super. E Branch to see

for 12/10

When H.E. the Governor was in Bijapur it was urged that Govt. should take steps to introduce all possible minor irrigation schemes in the Bijapur Distt. and also to assist installation of wells and pumps (vide copy of G.S's d.o. letter to Secy., P.W.D.). The P.W.D. desires that this Deptt. might give a note regarding wells.

2. In the years 1939 and 1940 some 3300 village water supply projects in the Province were investigated. Every year a lump provision is made for execution of village water supply projects through the special P.W.D. staff and through Rural Development Boards. G.D. is concerned with that part of the provision which is for projects to be executed through Rural Development Boards. The provision under the control of G.D. is placed at the disposal of the Commrs. who distribute it among the various distts. according to their needs. The Commr., S.D. may be allotting to the Bijapur Distt. a part of the grants placed at his disposal every year. The provision under the control of the P.W.D. is spent through the Supdtg. Engineers of Circles. The Commr., S.D. is in a position to give us an idea in consultation with the Supdtg. Engineer, S.C. regarding the state of drinking water supply in villages of the Bijapur Distt. viz. whether any appreciable progress has been made in the direction of providing adequate drinking water supply. The Commr. may be requested to state whether any progress can be made in the installation of wells and pumps in villages. ³// All talukas of the Bijapur distt. are included in concentrated areas and as such special proposals can be put up in the post-war reconstruction scheme No.93 - Improvement of Village Water Supply. The attention of the Commr.,

of Bijapur No.V.L.T.S.R.243, d/- 4-7-44, addressed to the Commr., S.D. and a copy of which was forwarded to this Deptt. with Commr., S.D.'s letter No.L.B.D. V.W.S., d/- 29-7-44. The proposals ^{were} submitted by the Commr. from the Collr. of Big Bijapur with reference to post-war scheme No.93 - Improvement of village water supply in concentrated areas. This Deptt. is still awaiting proposals from the Commr., C.D. It has been ~~decided~~ ^{considered desirable} that when all proposals are received, they should ~~be~~ ^{are to} be sent to the P.W.D. for further consideration (vide para.1 of F.D. note, d/- 10-8-44 in G.D. File 4837/33/13758-D). The Commr., C.D. has been expedited several times to submit his proposals. Consideration of proposals for the improvement of village water supply in all concentrated areas and evolving a definite plan of action will take considerable time. In the meanwhile it may appear desirable to do something for the Bijapur Distt. The Commr., S.D. may, therefore, be asked to submit the requisite proposals for the improvement of drinking water supply in villages in the Bijapur distt. for constructing new wells and/or repairing old ones and installation of pumps. The statement regarding village water supply scheme referred to in the Collr's letter was not received in this Deptt. The Commr. may be requested to forward that statement (in duplicate).

/In this connection please see scheme No.93 in the Pamphlet on post-war Reconstruction Planning in Bombay Province (p.206 of the pamphlet).

4. The next question to be considered is that of finance. The cost of proposals under scheme No.93 received so far runs into several lakhs of rupees. (The cost of projects proposed by the Collr. of Belgaum alone amounted to Rs.8,52,000 approximately (para.1 of G.D. note d/- 5-7-44 on G.D. File 4837/33). and the proposals under scheme No.93 require awful lot of knocking to put them into a comprehensive shape in order to preserve comparative uniformity of amenities in the concentrated areas (vide Sir Henry Knight's note d/- 30-8-44). The Commr., S.D. may, therefore, be requested to submit proposals which are most urgently needed to

Bijapur distt. He may be also requested to state whether he will be able to finance the cost of the proposals to be submitted by him from the annual grants placed at his disposal for village water supply and if any of the proposals are to be carried out before the end of the current financial year whether he would require any additional allotment for them. At any rate what is required is ^adefinite programme for improvement of drinking village water supply in the distt.

5. The accompanying memo. and endts. may issue. If considered necessary the R.C.D. and the F.D. may see u.o. first.

The Superintending Engineer,
Southern Circle, Belgaum.

Subject:- Construction of wells and tanks in
the Southern Division particularly
Bijapur District.

Reference your letter No.M.I.1 dated 29-11-45 on
the above subject. My section is at present attending
to the work of Constructing and Improving the Wells and
Tanks in the Province of Bombay including your Division
Two detailed notes on this subject are enclosed herewith
for your information and guidance.

As far as the Well Pumping is concerned we help
the cultivators in installing their pumping plants if
any applications are received. The mechanical service
is given free of charge for the first ten days and a
charge is for extra number of days at a sliding rate
is made according to the calibre of the mechanic who
is sent for doing the work. Similarly, help is given
for repairing the pumping sets free of charge if the
job is finished within the first three days. A charge
is made for extra number of days as stated above. No
travelling allowance of the Mechanic sent for the work
is charged.

There is no arrangement of giving any financial
help, either in the form of subsidy or tagavi, to the
cultivators for buying and setting up the pumping
machinery from this department. If a cultivator needs
any tagavi loan for the above, his case is recommended
to the Collector of the District with the estimates of
the plant. He gives him this grant from the gagavi
grant funds at his disposal, charging some interest.
If a cultivator needs any help in getting an essentiality
certificate in purchasing the machinery it is being
issued by this office after inquiring into the case.
There is no departmental scheme of buying pumping sets
and installing on any particular cultivator's well or
on river banks for the combined use of many cultivators.

The progress of the work in the well and tank
construction and improvement scheme in your Division is
given in the following statement. We have taken up
the works of these cases and given financial help to
them.

Sr.	Name of the District.	Const. of new wells.	Repair of old wells.	Const. of new tanks.	Repair of old tanks.
1	Bijapur	201	77	-	-
2	Belgaum	91	26	14	20
3	Dharwar	9	9	34	52
4	North Kanara	11	11	15	108
5	Ratnagiri	-	-	-	-
Total.		312	123	63	180

Some of the works are completed and the rest are in progress. The work was started in November 1944 and will be completed in November 1945. The applications for the construction of new wells are coming in great number and we have now closed taking any fresh applications for that work as the target for this work has already been reached. It is hoped that the above information will meet your needs. If you need any further information on the subject you may please write again and it will be supplied to you as much as possible.

Sd/- P.J. Patel,
Agricultural Engineer to Govt.,
B.P., Poona.

To
The Secretary to Government,
Public Works Department,
B. O. M. B. A. Y.

No. M. I. 1.

Public Works Department,
Belgaum, 8th December 1945.

Subject:- Tanks and wells in Bijapur District.

Below copy of D.O. Reference : P.W.D. endorsement of 17th October 1945
from Secretary to Governor, Bombay; to Secretary to
Government, P.W.D. (Irrigation.)
letter of 15th Oct. 1945

(1) Minor Irrigation Works.

It is ascertained that on account of extensive bunding operations in progress all over the District and poor rainfall there is little scope for Minor Irrigation (tank) projects in the Bijapur District. Whatever projects have been considered in the past are practically all for the purpose of alleviating distress caused by famine or scarcity. The three tanks of this category. Their present position is indicated below:-

mentioned in the
second para of D.O.

S.No.	Name of tank work.	Area that can be irrigated.	Estimated cost.	Amount spent so far.	Remaining approximate cost of completing the work at present day rates.
					Rs.
1	Makhanapur	1072 acres	Rs. 2,75,297	Rs. 2,14,413	3,06,300
2	Asangi	4459 "	" 2,22,004	" 2,33,290	2,95,000
3	Tarnal	160 "	" 1,02,762	1,34,712	1,02,500

These works have been selected for providing work for unskilled demobilised personnel (vide this office No. G-108/P.W. dated the 6th October 1945). They have also been proposed for being taken up as scarcity or famine works during the current year in the conference of Revenue and P.W.D. Officers held at Belgaum on 5th December 1945.

(2) Pumping Schemes (Emergency Irrigation Works)

At present, there are under construction in the Bijapur District two Lift Irrigation Schemes, one on the Krishna river at Korti and the other on the Malaprabha at Shivogmandir (Manglur). They have been sanctioned as Emergency Irrigation Works. They are expected to be completed before the next monsoon. Their particulars are as follows:-

S.No.	Name of Scheme.	Area that will be irrigated.	Estimated cost.	Anticipated cost of construction.
-------	-----------------	------------------------------	-----------------	-----------------------------------

S.No.	Name of Schme.	Area that will be irrigated.	Estimated cost.	Anticipated cost of construction.
-------	----------------	------------------------------	-----------------	-----------------------------------

1.	K. Korti	2,200 acres	1,52,048	Rs.2,20,000
2.	Shivvyogmandir	1,200 "	56,975	" 96,000

There are no schemes, flow or lift, other than the above that have been projected and are ready in the above District. However, though the rainfall is poor, the District is favoured with four big, perennial rivers flowing right across it and it is considered that more and perhaps larger lift schemes of the type now undertaken will confer great benefit on this frequent famine-ridden tract. In order to make the necessary investigations and prepare schemes for these and any possible flow irrigation (tank) works, the Executive Engineer, Bijapur, suggests the opening of an Irrigation Projects Sub-Division under the Project Circle. I recommend his suggestion for adoption. If the work cannot be undertaken by the Project Circle, it could be done by this Circle.

(3) Installation and repairs of wells, tanks and pumps:

This work is being done under the supervision and control of the Agricultural Engineer to Government. A copy of the report of that Officer (No.W.I.S./Bijapur/11884 dated the 5th December 1945) which gives all the details, is attached. It would appear that more funds would need to be allotted to meet the increasing demands from the people in this respect.

Accompts:-

1 Copy of letter.

Superintending Engineer, S.C.

It.

8/12

Submitted with ref. to the Govt. Endt., dated 17-10-1945, calling for the S.E., S.C.'s remarks on the necessity of introducing all possible minor irrig schemes into the Bijapur Dt.

2. The S.E.C's remarks in the matter are briefly as under:-

(i) Minor Irrign. Works:- On account of extensive bunding operations in progress all over the District and poor rainfall, there is little scope for Minor Irrign. (tank) Projects in the Bijapur Distt. The projects considered in the past were all for the purpose of alleviating distress caused by famine or scarcity. The present position of the three tanks refd. to in para. 2 of the Gov's. Secy's d.o. has been explained by the S.E. in his letter under refce. These works have been selected for providing work for unskilled demobilised personned and have also been proposed for being taken up as scarcity or famine works during the current year.

(ii) Pumping Schemes (Emergency Irrign. Works):- There are, at present, only two Lift Irrign. Schemes, one on the Krishna river at Korti and the other on the Malaprabha at Shivyogmandir, which have been sanctioned as E.I. works. These works are expected to be completed before the next monsoon.

(iii) Installation and repair of wells, tanks and pumps : The S.E. has attached a letter from the Agricultural Engr. to Govt. under whose supervision and control this work is being done. Perusal is requested to the letter which is self-explanatory.

3. According to S.E., S.C., though the rainfall is poor in the Bijapur Dt., it is favoured with four big and perennial rivers flowing right across it and that more and larger lift schemes of the type mentioned at 2(ii) above may confer greater benefit on this famine-ridden tract. The S.E. accordingly

and prepare schemes for these and any possible flow
irrign.(tank) works.

It is for orders whether the S.E.'s. recommendat-
ion may be accepted. If so, it appears desirable to
consult the S.E.,P.C., in the matter, as it would be
better if the proposed Project Sub-Dn. is opened under
the P.C. as also recommended by the S.E.,S.C.

4. The General and the Reconstruction Deptts. were
requested to give a note on Wells and Minor Tanks respe
respectively in this connection. The R.C.D. has called
for a report on minor tanks from the Collector of Bijapur
and the G.D. too has asked the Commr., S.D., to submit
proposals for improvement of drinking water supply in
villages of the Bijapur District.

Pending receipt of further information from the above
two Deptts., attention is invited to the G.D. note regarding
wells in the Bijapur District.

5. It is also for orders whether the papers may be reld.
at this stage to the G.D. and the R.C.D with ref. to the
Agricultural Engr's. letter re: wells and tanks in the
S.D. particularly in Bijapur District for any remarks
that either of the Deptts. might like to offer thereon.

6. Incidentally, two inquiries were made so far from the
G.S's. office regarding the progress of this case. It
is for consideration whether the papers may be shown u.o.
to the G.S. on their return from the G.D. and the R.C.D.

Thro' P.W.R.B., E.B.(I) and D.E.(I) and D.E.(I).

Regarding the S.E.,S.C.'s suggestion to undertake
more large lift irrigation schemes it is submitted that the
success of such schemes already undertaken is yet to be established.
When Sir William Stampe suggested large river pumping schemes for this
there was a considerable discussion and some scepticism was felt about their
success. The schemes were nevertheless undertaken as an experimental
measure. The working of the schemes already sanctioned may therefore
be watched for sometime before deciding to multiply them

may be shown to the G.S.

3. I may add for information that M/S Istur and Murti who were appointed Officers on special duty to investigate minor irrigation schemes did very little work in the Bijapur District, their activities having been confined mainly to the other districts in Karnatak. No. M.I. schemes are therefore available from this source

Id.
21 XIII 45.

It is very different to undertake any fresh investigations at this time owing to the extreme shortage of Engineering Staff, the Scarcity & Famine works which will soon have to be taken up. I, however, do feel that when trained staff is available a full investigation into the possibilities of irrigation in the Bijapur Dist. should be undertaken. In years of light or little rainfall small tanks are of no use hence ambitious large Tank Schemes will have to be thought of. At the moment we are thinking of ~~classifying~~ ^{closing} water supply Sub. Dn. to release staff for Famine works.

u.o.r. to G.S., dated 27th Dec. 45
M.E. would like A(R) to see

I agree with the proposals made by the Superintending Engineer, subject to Secy. P.W.D.(I)'s remarks.

2. The need for irrigation works has of course been urged on us on several occasions in the past year or two. It was urged by Mr. Dinkar Desai's Committee at the time of the last famine. It was further represented to the Famine Enquiry Commission by several non-officials. The main factor of course is the one which exists in many other districts liable to famine, i.e. the cultivators bank on the rains. There is thus the anomaly that in

Good years, when the tanks are full, the water is not taken, and in bad years the water is not sufficient to have much practical effect. It is therefore essential that either the Irrigated Crops Act ~~Crops Act~~ and taking of water compulsorily should be applied, or they should be placed under the Revenue Department and subjected to a combined revenue and water assessment.

3. The difficulty stated by Secy. in regard to staff is a real one & I cannot see at present how it is to be met. It is under consideration in the weekly P.W.R. meeting of **Advisers**, Secys & I am noting on it fully in that respect.

Reconstruction Department.

These papers have been referred to this Department with reference to paras. 4 and 5 of the P.W.D. note dated 12th December 1945 at page 32 ante.

2. As reg. para. 4 of the P.W.D. note please see the notes on pp. bearing No. 1590/39/19769 (linked case) submitted herewith.

3. The recent figures corresponding to those reported by the Agrl. Engr. in December 1945 p. 21 ante) are as follows:-

Repairs of old wells	271
Construction of new wells	1198

It will be seen that there is a considerable increase in the repairs of old wells. The pp. may be returned to the P.W.D.

U.O.R. to P.W.D. May 1946. Id. 1-5-46. 3/5/ D.A.L. 3/5/

Reconstruction Department.

Submitted with ref. to the Under Secy's
note dated 28th February 1946.

The P.W.D. main file is put up herewith
as a linked case No. 2723/36. It will be
seen from that Deptt's. notes at pages 31 to
34 thereof that, that Deptt. has already got
the information in reg. to minor irrigation
works and wells and tanks in the Bijapur distt.
The reports of the Agrl. Engr. and the S.E.,
N.C. are at pages 21 and 23 resptly. of the
P.W.D. file. The statement showing details
reg. minor tanks in the M Bijapur distt. is
at page 13 ante. With refce. to the Collr's
remarks that the irrigation tanks at
Makhanapur, Nandrgi, Asangi and Tarnal are
major works it may be stated that ~~the~~ case
(file No. 393/39) sanctioning the three works
of Asangi, Makhanapur, and Tarnal ^{is} being
submitted to H.M., ^{P.W.D.} separately for orders.
The P.W.D. and F.D. have already agreed to
~~the~~ works being taken up. This may
be shown to P.W.D. along with the linked case
P.W.D. file 2723/36.
